Mounting Aircraft Cable, 1/8" Diameter
302 / 304 Stainless Steel

(A5-ZOZO-AC-18-X) X = Specify Length

Assembled Dimensions

Cable Lock for 1/8" Diameter Cable

Zinc Plated

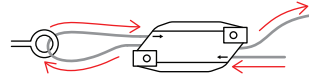

(A5-ZOZO-CL-18)

SPECIFICATIONS

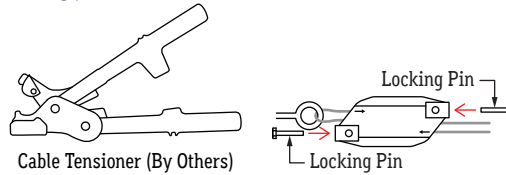

Material	302 / 304 Stainless Steel
Size	1/8" (0.125") Diameter
Coating	Uncoated
Minimum Break Strength	1700 lbs
Rating	Outdoor
Weight	0.007 lbs per foot

INSTALLATION

- 1 Fasten one end of the Mounting Aircraft Cable to mounting hardware (by others) using wire rope clamps or cable ferrules (by others).
- 2 Loop the other end of the Mounting Aircraft Cable through Cable Lock and mounting hardware (by others).

- 3 Use a cable tensioner (by others) to create tension along the cable, then install locking pins to set the cable lock.

A8 Series | String / Festoon ZOZO Mounting Aircraft Cable

(A5-ZOZO-AC-18-X)

FEATURES

- Commercial grade, multi-purpose cable for reliable suspension.
- Available in rolls of specified length up to 300'.
- Suitable for use with cable locks (A5-ZOZO-CL-18) or other mounting hardware (by others). Refer to installation instructions to see details on acceptable mounting hardware.

- 4 Hang light string onto Mounting Aircraft Cable, then install bulbs to sockets.
- 5 After load is suspended, use the cable tensioner (by others) to eliminate any undesired slack in the cable. Set both locking pins on each Cable Lock, then trim excess cable and leave a minimum of 3" of slack on the exiting cable.
- 6 Refer to installation instructions for more detailed explanations of mounting light string, installing end cap, and mounting hardware.
